## **Research Study: Volunteers Needed!**

**Females Ages 18-70 years of age  
Healthy Volunteers  
and  
Patients with Fibromyalgia**

The Neurosciences Institute of Albany Medical College is looking for healthy female volunteers and female patients with painful fibromyalgia to take part in a research study. Symptoms of fibromyalgia may include chronic widespread pain, painful response to gentle touch, tiredness, numbness and tingling.

The purpose of this research study is to find out how an FDA approved medication works on nerve endings in people with Fibromyalgia. This FDA-approved treatment for fibromyalgia may relieve the symptoms of fibromyalgia, including:

- \* Pain reduction
- \* Overall fibromyalgia improvement
- \* Improved physical function

By relieving your fibromyalgia symptoms, you may be able to do more of the things you want and need to do.

- Visits will be done at the Albany Medical Center Neurology Clinic
- Healthy volunteers will have 1 to 2 visits over approximately 2 weeks and will not be required to take study medication.
- Patients with fibromyalgia will have 4 visits over 8 to 10 weeks.
- Compensation will be provided.
